Product Information

We have been successful in retaining an important niche in the manufacture and pulverization of industrial mineral products.

Our product range includes Quartz (Brand name- SHREE-Silica), Feldspar (Potassium and Sodium under the brand names- SHREE-K-Spar, SHREE-Na-Spar), Limestone (SHREE-Lime), Talc (SHREE-Talc), Dolomite (SHREE-Dolo), available in all forms, namely Granular particles, fine powder (mesh size ranging from 100-500) and lumps (1-15 inches). Standard packing is available in 40-50 kg HDPE bags, 1 mt Jumbo bags or as per customer requirements.

SHREE Mineral Enterprises

Process Operations

We procure high-quality ore from our owned mineral rich mines and process the whole range of minerals at our modernized plant, equipped with the state-of-the-art manufacturing facilities. Our Ball Mills, lined with Silex & Felsite media are equipped with Heavy Magnetic Iron Separators, in order to eliminate iron impurities and ensure supreme whiteness.

The entire production process is stringently monitored through quality control checks at various stages. Our well-equipped Quality Assurance Lab is manned by technical specialists possessing vast industrial knowledge. Various aspects of product characteristics are measured and analyzed regularly, in order to best serve customer's requirements.

We devise customized delivery solutions for our customers, while deploying ultra-modern transportation system and maintaining massive warehouses for storage and dispatch.
